About The Program

FEM - Finite Element Method is a technique used to solve the mathematical equations arising during the analysis of an object. FEM is a very popular technique incorporated by much industry-grade software used by the analysis based companies. It is always better to get familiar with new-age industry methods to cope with the competition and create your own stance. This workshop provides an opportunity to learn about the Finite Element Method in detail and make you appreciate its importance in the present day industry.
